REASONS FOR ALLOWANCE

The invention as claimed is a method for forming an ankle brace, and avoids the prior art. The present invention involves a method of creating an ankle brace by using a positive mold of the lower extremity; overlaying it with two layers of thermoplastics and applying a vacuum. Ruscito et al. [5573501] which is cited in the prior Office action (paper no. 19) discusses the formation of an ankle brace from a thermoplastic material, bonds a layer of thermoplastic with a layer of resin. Wehr [5520628] discloses a similar method of forming an ankle brace, but Wehr does not disclose using two pieces of thermoplastic material that have differing surface areas. Also, Wehr does not disclose forming a positive mold of lower extremity and further modifying the mold such that the mold deviates from the shape of the molded lower extremity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
